Press release

Eurovia and Colas win the maintenance contract for the Santiago de Chile metro

The joint venture bringing together ETF (subsidiary of Eurovia, VINCI), lead company, and Colas Rail (subsidiary of Colas, BOUYGUES) has won the 7-year maintenance contract for the Santiago de Chile metro.

The contract, with an overall value of €35 million, covers preventive and corrective maintenance activities, “special corrective works” on rubber-tyred Lines 1, 2 and 5 and rail Lines 4 and 4A and comprehensive grinding of Lines 4 and 4A. The five lines that currently make up the Santiago metro system have a total length of 103 kilometres and 100 stations.

This project boosts the operations of ETF and Colas Rail in Chile, where the two companies are already working together on the contract covering design, construction and 20-year maintenance of two new metro lines – Lines 3 and 6, which will add 37 kilometres starting in 2017 and 2018.

About Eurovia

Eurovia, a subsidiary of VINCI, is a world leader in the construction of transport infrastructure and urban development. Eurovia builds transport infrastructure, including roads, motorways, railways and airport and tramway platforms, and contributes to industrial, commercial, and urban site development. In addition, the company possesses extensive know-how in related areas: demolition and deconstruction, drainage, excavation, roadwork and utility networks, signage, engineering structures and noise barriers. Eurovia also controls its supply chain through its industrial network, which produces aggregates and materials for roadway and railway construction projects. Eurovia operates in 15 countries, employs 38,000 people and achieved sales of €7.9 billion in 2015 and a net profit attributable to the Group amounted to €146 million.
