Colas Rail wins three rail network renewal and maintenance contracts in France and the United Kingdom

Colas Rail, the rail subsidiary of the Colas Group, has secured two maintenance contracts for the French rail network awarded by SNCF Réseau, for a total of approximately €300 million in a consortium with TSO (a subsidiary of NGE):

- the first contract, for a period of three years with an option for two additional years, concerns the renewal of ballast on 374 km of track and crossings on 160 km of track for four high-speed lines (LGV Nord, LGV Atlantique, LGV Paris Sud-Est and LGV Méditerranée);
- the second contract involves the renewal of overhead lines across the entire national rail network, for a period of five years with an option for two additional years. On this occasion, the consortium bid with an innovative technique designed to industrialize the work process by using purpose-designed trains.

In addition, Colas Rail Ltd, a British subsidiary of Colas Rail, has been awarded a seven-year track maintenance contract by Network Rail. The £225 million (€255 million) contract covers the supply, operation and maintenance of heavy railway equipment. In addition to its current fleet, Colas Rail Ltd will invest in high-performance machines that will enable Network Rail to improve service to UK rail operators.

A longstanding player on the maintenance market for the British railway network, Colas Rail Ltd had already performed a similar contract for a duration of seven years.

The Colas Group (www.colas.com)

Colas, a subsidiary of the Bouygues Group, is a world leader in the construction and maintenance of transport infrastructure, aiming to meet the challenges of mobility, urban development and environmental protection. With 55,000 employees in more than 50 countries on five continents, the Group performs some 90,000 projects each year via 800 construction business units and 2,000 material production units.

In 2016, consolidated revenue at Colas totaled 11.0 billion euros (48% outside of France).
